**S** Anteojos de seguridad

**E** Step Ladder

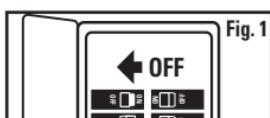

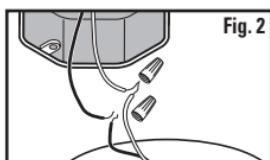

**F** Escabeau

**S** Escalera de mano

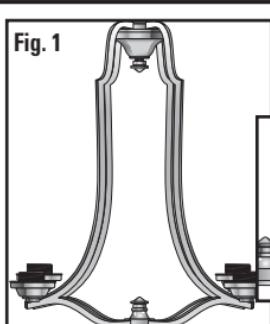

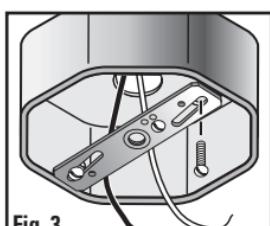

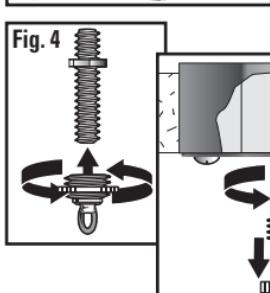

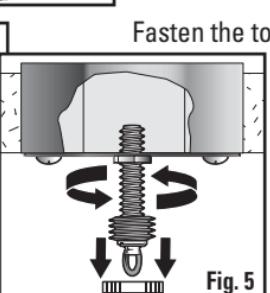

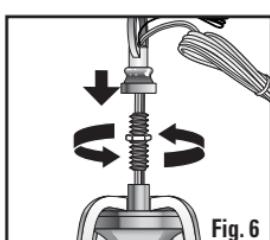

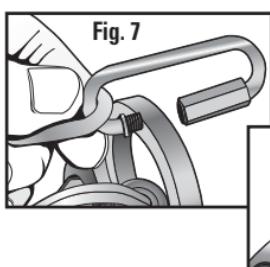

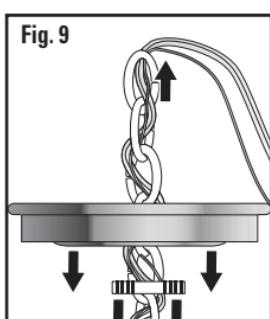

## Preparation

**DO NOT USE THIS FIXTURE WITH A DIMMING CIRCUIT.** If you presently have dimmer controls, you will need to remove them, and replace them with regular electrical switches. If you have a three way dimmer, you will have to replace it with a regular three way switch. **If you are unfamiliar with electrical installations, we recommend you have a qualified electrician do your installation.**

- 1  **Fig. 1** **WARNING:** Shut off power at the circuit breaker or fuse panel before removing the old fixture (**Fig. 1**).
- 2  **Fig. 2** Remove the old fixture. Make yourself a sketch of how the fixture is wired (index the sketch by wire color) or mark the wires themselves with masking tape and a pencil so you will know how to connect the wires to your new fixture (**Fig. 2**). If several wires are involved or if the wiring seems more complicated and perhaps even includes a red wire, take note of the connections before you disconnect them.

## Fixture Installation

- 1  **Fig. 1** The fixture has been shipped with its arms collapsed to reduce packaging size (**Fig. 1**). Move the arms and align into the proper position (**Fig. 2**). Tighten each hex nut on the bottom of the fixture to secure the arms in place. **DO NOT OVERTIGHTEN.** **Fig. 2**
- 2  **Fig. 3** Secure the mounting bracket to the electrical box using the existing electrical box screws (**Fig. 3**). Pull the existing supply wires around the sides of the mounting bracket. Do **NOT** pull the supply wires through the center hole of the mounting bracket.
- 3  **Fig. 4**  **Fig. 5** Fasten the top finial loop to the included threaded tubing until it is secure (**Fig. 4**). Screw the threaded tubing into the center round opening in the mounting strap, about 1/4" or up to the pre-attached hex nut (**Fig. 5**). Tighten the hex nut up against the strap until the threaded tubing is secure and does not turn. Remove the thread lock.
- 4  **Fig. 6** Thread the grounding wire and the cord through the center of the threaded tubing and the fixture finial loop. Screw the threaded tubing in place and secure with one of the included hex nuts. Gently pull the wires to let up the slack and screw the top finial loop until it is secured to the top of the fixture (**Fig. 6**). **DO NOT OVERTIGHTEN.**
- 5  **Fig. 7** Using your fingers, open the chain lock from one of the included chain locks and attach the chain lock to the fixture finial loop (**Fig. 7**). Adjust the chain to the desired length by removing as many chain links from the top of the chain as necessary (**Fig. 8**). **Fig. 8**
- 6  **Fig. 9** Weave the electrical cord and the bare copper ground wire through the remaining chain links (**Fig. 9**). After weaving the electrical cord through the full length of the chain, thread the wire through the thread lock and the ceiling cap. Make sure the ceiling cap and thread lock are oriented so they will attach correctly to the ceiling. Move them down the chain so they are out of the way for the chain installation.

7

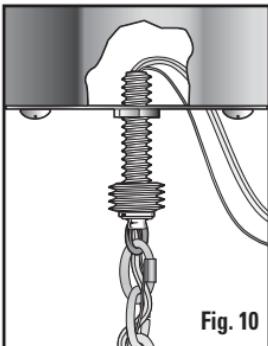

Fig. 10

Attach the remaining chain lock to the top finial loop attached to the electrical box. Next, lift the fixture up by the chain and hook the top finial loop to the top chain link using the chain lock. Using your fingers, close the chain lock. Thread the cord and ground wire up through the threaded tubing and pull the excess wire and out of the electrical box (Fig. 10). **IMPORTANT:** the weight of the fixture **MUST** be supported by the chain, not by the electrical cord.

8

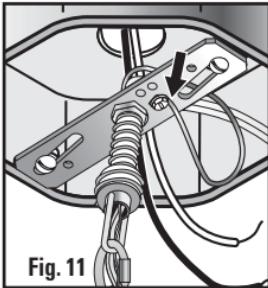

Fig. 11

**For safety and proper operation, your fixture must be properly grounded (Fig. 11).** If you are unfamiliar with the methods of properly grounding your fixture, consult a qualified electrician. A copper ground wire is pre-attached to your fixture pan. If your electrical box is made of plastic and/or has a green or bare copper grounding wire inside, the fixture grounding wire and the electrical box ground wire should be connected together using one of the wire nuts (included). If your electrical box is made of metal is already grounded, you simply secure the bare end of the fixture ground wire to the crossbar using the green grounding screw on the crossbar.

9

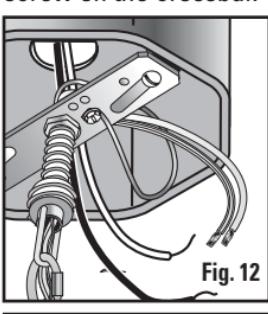

Fig. 12

Trim the excess fixture wire, leaving 6" (16.2 cm) for connections (see #11) (Fig. 12). Split the fixture wire into two (2) separate leads, and strip off 1/2" of the insulation.

10

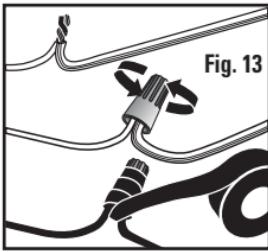

Fig. 13

Connect the fixture wire with the ribbed insulation side to the white wire of the supply circuit using a wire nut (included) (Fig. 13). Connect the smooth insulated side wire to the black wire of the supply circuit with a wire nut (included). No loose wire strands or connections should be exposed. Secure all wire nut connections with electrical tape to prevent wire nuts from coming loose.

11

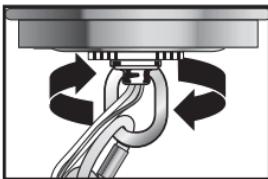

Fig. 14

Pull the ceiling cap and the thread lock up the chain and over the top final loop (Fig. 14). Tighten the thread lock to the top finial loop until it is secured to the ceiling.

12

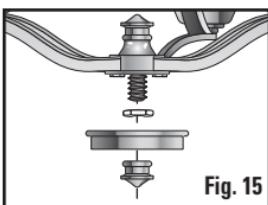

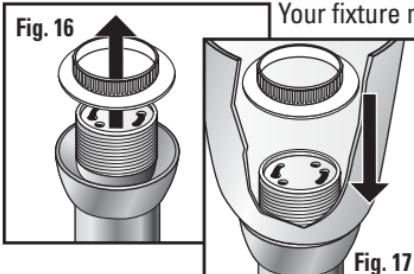

Fig. 15

Screw the included threaded tubing into the bottom of the fixture. Secure with the included hex nut. Leave about 1-1/2 in. of space to screw on the decorative cap and finial. Secure the decorative cap and the finial to the bottom of the base (Fig. 15).

13

Your fixture may be packaged with the diffuser locking ring already in place. If this is the case, the diffuser locking ring will need to be removed before installing the diffuser (Fig. 16). Unscrew the diffuser locking ring by turning counterclockwise. Set aside. While holding the glass diffuser, secure the diffuser by screwing on the diffuser locking ring in a clockwise direction (Fig. 17). Hand-tighten the diffuser

locking ring until it is on tightly and the diffuser is held securely in place. **CAUTION: DO NOT OVER-TIGHTEN!** Over-tightening may cause the diffuser to crack. Repeat for all 5 diffusers.

14

Fig. 18

Insert the proper GU24 base 13W compact fluorescent bulb into the socket (Fig. 18).

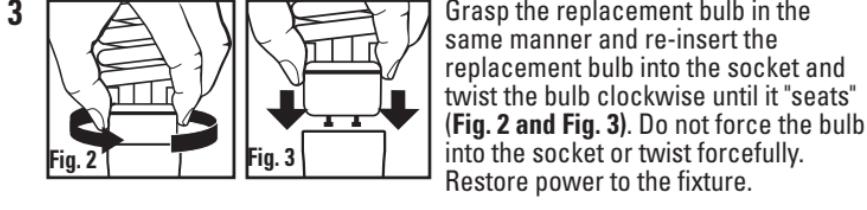

Depending on the store where you purchased your fixture, it may or may not include the bulb with it. If you need to purchase a bulb, you will need to purchase a **13 Watt/CCT-3000K/CF13W/ self-ballasted GU24 base compact fluorescent bulb**. Hold the bulb by its base, insert the pins into the 2 curved slots in the bulb socket and twist clockwise until the bulb "seats". The bulb can only

go into the socket one way. Do **NOT** force the bulb. **CAUTION: DO NOT HOLD THE BULB BY THE GLASS DURING INSERTION OR REMOVAL TO PREVENT ACCIDENTAL BREAKAGE! HOLD THE BULB BY THE PLASTIC BASE.** Restore power to the electrical box to make sure your fixture is working properly.

## Bulb Replacement Instructions

Your bulb should last up to 10,000 hours in normal use. When bulb replacement is necessary, you must replace the bulb with a **13 Watt/CCT-3000K CF13W self-ballasted GU24 base fluorescent bulb**. These bulbs are readily available at your local home center and most larger hardware stores.

- Shut off main power supply. Allow sufficient time for bulb to cool properly before handling.

## Troubleshooting Guide

Minor problems often can be fixed without the help of an electrician. Before doing any work on the fixture, shut off power supply at the circuit breaker panel to avoid electrical shock.

Problem	Cause	Solution
Fixture doesn't light	Bulb is defective	Replace bulb
	Power is off	Check if power supply is on
	Bad wire connection	Check wiring
	Bad switch	Test or replace switch
Fuse blows or circuit breaker trips when light is turned on	Crossed wires or power wire is grounded out	Check wiring connections

## Cleaning Instructions

Your fixture is made from quality materials that will last for many, many years with minimum care. You may want to periodically clean the fixture using a mild, non-abrasive glass cleaner and soft cloth. Do **NOT** use solvents or cleaners containing abrasive agents. When cleaning the fixture, make sure you have the power turned off and do not spray liquid cleaner directly onto the bulb, socket, ballast, or wiring.

# Instrucciones de limpieza

Este aplique de luz está hecho con materiales de calidad que durarán muchos, muchos años con un mínimo de cuidado. Es posible que quiera limpiar periódicamente el aplique utilizando un limpiador de vidrio suave y no abrasivo y un paño suave. **NO** use solventes ni limpiadores que contengan agentes abrasivos. Cuando limpie el aplique, asegúrese de que ha cortado el suministro eléctrico y no rocíe limpiador líquido directamente sobre la bombilla, el portalámpara, el equilibrador o los cables.

# Good Earth Lighting® Warranty

## 3 YEAR LIMITED WARRANTY

The manufacturer warrants this lighting fixture to be free from defects in materials and workmanship for a period of (3) years from the date of original purchase by the consumer. We will repair or replace (at our option) the unit in the original color, and style if available, or in a similar color and style if the original item has been discontinued, without charge. The manufacturer warrants the lamp for 3 years, providing the lamp is not used in a commercial application where it is on 24 hours per day, but is used in a residential environment for 3-5 hours per day. Defective units must be properly packed and returned to the manufacturer with a letter of explanation and your original purchase receipt showing date of purchase. Call 1-800-291-8838 to obtain a Return Authorization number and an address where to ship your defective product. Note: No C.O.D. shipments will be accepted. The liability of the manufacturer is in any case limited to replacement of the defective light fixture product. The manufacturer will not be liable for any other loss, damage, or injury which is caused by the product. This limitation upon the liability of the manufacturer includes any loss, damage, or injury which is (I) to person or property or otherwise; (II) incidental or consequential in nature; (III) based upon theories of warranty, contract, negligence, strict liability, tort, or otherwise; or (IV) directly, or indirectly related to the sale, use, or repair of the product. This warranty gives you specific rights, and you may also have other rights which vary from state to state.

# Garantie de Good Earth Lighting®

## GARANTIE LIMITÉE DE 3 ANS

Le fabricant garantit ce luminaire contre les défauts de matériaux ou de fabrication pour une période de trois (3) ans à compter de la date d'achat originale. Nous réparerons l'article ou nous le remplacerons (à notre discrétion) par un article de la même couleur et du même style sans frais. Le fabricant garantit la lampe pendant trois ans, à condition qu'elle ne soit pas utilisée dans une application commerciale où elle serait allumée 24 heures sur 24, mais qu'elle soit utilisée dans un environnement résidentiel pendant 3 à 5 heures par jour. Si l'article original n'est plus offert, il sera remplacé par un article d'une couleur et d'un style similaires. Les produits défectueux doivent être correctement remballés et retournés au fabricant avec une lettre d'explication et le reçu original sur lequel figure la date d'achat. **Composez le 1 800 291 8838** pour obtenir un numéro d'autorisation de retour et l'adresse pour livrer les produits défectueux. Remarque : Aucun envoi C.R. ne sera accepté. La responsabilité du fabricant se limite au remplacement des produits d'éclairage défectueux. Le fabricant n'est pas responsable des pertes, des dommages ou des blessures occasionnés par le produit. Cette limitation de la responsabilité du fabricant inclut (I) les blessures ainsi que les pertes et les dommages matériels ou autres; (II) les dommages accessoires ou consécutifs; (III) les blessures, les pertes et les dommages reposant sur une théorie de garantie, de contrat, de négligence, de responsabilité stricte, de délit ou autre; (IV) les blessures, les pertes et les dommages directement ou indirectement liés à la vente, à l'utilisation ou à la réparation du produit. Cette garantie vous confère des droits précis. Il est possible que vous disposiez également d'autres droits, qui varient d'un État ou d'une province à l'autre.

# La Garantía de Good Earth Lighting®

## GARANTÍA LIMITADA DE 3 AÑOS

El fabricante garantiza que este producto de iluminación no presentará defectos de fabricación ni en los materiales durante un período de (3) años desde la fecha de compra original. Repararemos o reemplazaremos sin costo alguno (según nuestro criterio) la unidad en el color y el estilo original, si están disponibles, o en un estilo y color similares, si el original ha sido discontinuado. El fabricante garantiza la lámpara por 3 años, siempre y cuando dicha lámpara no se utilice en una aplicación comercial en la que esté encendida 24 horas al día, sino que se utilice en un entorno residencial durante 3-5 horas al día. Las unidades defectuosas se deben empaquetar correctamente y devolver al fabricante con una carta explicativa y el recibo de compra original con la fecha de compra. **Llame al 1-800-291-8838** para obtener un número de autorización de devolución y una dirección donde enviar el producto defectuoso. Nota: No se aceptarán envíos contra reembolso (COD, por sus siglas en inglés). Bajo cualquier circunstancia, la responsabilidad del fabricante se limita al reemplazo del producto de iluminación defectuoso. El fabricante no será responsable de ninguna otra pérdida, daño o lesiones causadas por el producto. Esta limitación de la responsabilidad del fabricante incluye cualquier pérdida, daño o lesiones a la (I) persona o a la propiedad o; (II) que sea de naturaleza accidental o resultante; (III) que se base en teorías de la garantía, contrato, negligencia, responsabilidad estricta, agravio o de otro tipo; o (IV) que se relacione de manera directa o indirecta con la venta, uso o reparación del producto. Esta garantía le otorga derechos específicos, pero es posible que acceda a otros derechos dependiendo de su estado de residencia.
