

Important Safety and Performance Tips for Using Good Earth Long-Lasting Lithium-Ion Rechargeable Lighting

1. Only use USB chargers specified by the manufacturer for the product.
2. All Good Earth Lighting rechargeable products require the use of a **5 Volt, 1 Amp (5v 1amp) USB charger only**.

Here is an example photo of a correct charger showing the volts and amps:

3. Never overcharge the product using more powerful chargers.

⚠ Warning: The use of overpowered chargers can damage the product and potentially create unsafe use conditions. Always check the USB charger to ensure it is 5v 1amp.
